

Dynamic Implementation

Example dynamic-implementation can be browsed at <https://github.com/apache/tomee/tree/master/examples/dynamic-implementation>

Help us document this example! Click the blue pencil icon in the upper right to edit this page.

SocialBean

```
package org.superbiz.dynamic;

import org.apache.openejb.api.Proxy;

import javax.ejb.Singleton;
import javax.interceptor.Interceptors;

@Singleton
@Proxy(SocialHandler.class)
@Interceptors(SocialInterceptor.class)
public interface SocialBean {
    public String facebookStatus();

    public String twitterStatus();

    public String status();
}
```

SocialHandler

```
package org.superbiz.dynamic;

import java.lang.reflect.InvocationHandler;
import java.lang.reflect.Method;

public class SocialHandler implements InvocationHandler {
    @Override
    public Object invoke(Object proxy, Method method, Object[] args) throws Throwable
    {
        String mtd = method.getName();
        if (mtd.toLowerCase().contains("facebook")) {
            return "You think you have a life!";
        } else if (mtd.toLowerCase().contains("twitter")) {
            return "Wow, you eat pop corn!";
        }
        return "Hey, you have no virtual friend!";
    }
}
```

SocialInterceptor

```
packagenull
}
```

SocialTest

```

package org.superbiz.dynamic;

import org.junit.AfterClass;
import org.junit.BeforeClass;
import org.junit.Test;

import javax.ejb.embeddable.EJBContainer;

import static junit.framework.Assert.assertTrue;

public class SocialTest {
    private static SocialBean social;
    private static EJBContainer container;

    @BeforeClass
    public static void init() throws Exception {
        container = EJBContainer.createEJBContainer();
        social = (SocialBean) container.getContext().lookup("java:global/dynamic-implementation/SocialBean");
    }

    @AfterClass
    public static void close() {
        container.close();
    }

    @Test
    public void simple() {
        assertTrue(social.facebookStatus().contains("think"));
        assertTrue(social.twitterStatus().contains("eat"));
        assertTrue(social.status().contains("virtual"));
    }
}

```

Running

```
