spring-data-proxy-meta

Example spring-data-proxy-meta can be browsed at https://github.com/apache/tomee/tree/master/examples/spring-data-proxy-meta

Spring Data With Meta sample

This example simply simplifies the usage of spring-data sample providing a meta annotation @SpringRepository to do all the dynamic procy EJB job.

It replaces @Proxy and @Stateless annotations.

Isn't it more comfortable?

To do it we defined a meta annotation "Metatype" and used it.

The proxy implementation is the same than for spring-data sample.
